### Message from the Guest Editors

Dear Colleagues,

As we all know, the replacement of missing hard dental tissues is a challenge for every practitioner. Restoring form and function nowadays requires a high standard of knowledge because the materials, technologies and techniques that we use are developing rapidly. This is why a full understanding of the properties, indications and contraindications of each material and technique is the first prerequisite for long-term clinical success.

Physical, chemical and biological properties are of major importance, allowing the practitioner to choose the most suitable solution for a given clinical case. Laboratory tests, without any doubt, contribute to the characterization and development of dental materials and their practical application. Obviously, the complete description of a material or technique is obtained through well-designed clinical studies. The dental team should be also aware of the consequences related to the selection of an improper material or technique.

We kindly invite you to submit your manuscript(s) for this Special Issue, including full papers, communications and reviews.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
