Deadline for manuscript submissions:

**closed (20 January 2024)**

### Message from the Guest Editors

This Special Issue is dedicated to exploring the application of advanced modeling and experimental techniques in order to enhance the casting and electromagnetic treatment processes within the steel and metal industries. Computational fluid dynamics is employed as a powerful tool for simulating the casting process and investigating the impact of electromagnetic fields. Moreover, the influence of electromagnetic treatment on the solidification behavior and microstructure of various metals and alloys is a key focus of this Special Issue.

An important aspect highlighted in this Special Issue is the integration of modeling and simulation techniques with optimization algorithms, which allows for the development of more efficient casting processes. Researchers present innovative strategies for optimizing process parameters, such as cooling conditions and electromagnetic field parameters, with the ultimate goal of achieving improved casting quality and productivity. This Special Issue aims to provide a comprehensive overview of the latest advancements in the modeling and simulation of casting and electromagnetic treatment processes.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
