## Future Trends in High-Entropy Alloys (2nd Edition)

Guest Editors:

**Prof. Dr. Jason Shian-Ching Jang**

Department of Mechanical Engineering, Institute of Materials Engineering and Engineering, National Central University, Taoyuan, Taiwan

**Prof. Dr. Che-Wei Tsai**

1. Department of Materials Science and Engineering, National Tsing Hua University, Hsinchu, Taiwan  
2. High Entropy Materials Center, National Tsing Hua University, Hsinchu, Taiwan

Deadline for manuscript submissions:

**20 November 2024**

### Message from the Guest Editors

Dear Colleagues,

High-entropy alloys (HEAs) is an exciting and vibrant research field in materials science, and recently, the research on HEAs has been widespread across the globe. Numerous studies have shown that the high-entropy strategy has great potential for developing new materials with properties beyond those of conventional materials based on one principal element or component by exploring central regions of complex composition space. The topics of interest in this Special Issue include, but are not limited to, the preparation, properties, and applications of materials, encompassing experimental, theoretical, and computational research on phase diagrams, processing, microstructure characterization, and mechanical, physical, chemical, and functional properties of HEMs.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
