### Message from the Guest Editor

Dear Colleagues,

Cold gas spraying (CGS) has emerged as a promising technology for the deposition of a wide range of materials onto various substrates. This Special Issue aims to highlight recent advancements in CGS technology and its applications in the fields of coating and additive manufacturing.

The Special Issue features contributions from experts in the field who present novel research findings, innovative methodologies, and industrial applications of CGS. The topics covered in this Special Issue include, but are not limited to:

- Characterization of CGS coatings: microstructure, mechanical properties, and performance evaluation
- Novel materials and feedstock development for CGS
- Multifunctional coatings and tailored properties using CGS
- CGS for additive manufacturing: process development, material selection, and part quality
- Hybridization of CGS with other coating and additive manufacturing techniques
- Computational modeling and simulation of CGS processes
- Applications of CGS in aerospace, automotive, energy, biomedical, and other sectors
- Environmental considerations and sustainability

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

### Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
