Message from the Guest Editors

Dear Colleagues,

Composite materials possess outstanding properties, including low weight, high strength, fatigue resistance, and tunable designs, compared with traditional engineering materials.

This Special Issue aims to focus on the characterization and analysis of structures and properties of composite materials at different length scales, using the NDT, multi-scale, together with artificial intelligent approaches, including ultrasonic testing, acoustic emission technique, radiographic testing, computer vision inspection, theoretical calculations, constitutive modeling and simulation, molecular simulations, machine learning, etc. We aim to particularly focus on the joint efforts of multidisciplinary techniques to characterize the structural defects and properties degradation of the composites, including, but not limited.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
