Materials Science, Polish
Academy of Sciences, 30-059
Krakow, 25 Reymonta St., Poland

Deadline for manuscript
submissions:

10 December 2024

Message from the Guest Editor

Dear Colleagues,

The topic of this Special Issue titled “Latest Research on Photovoltaic Materials and Solar Cells” is dedicated to the development of solar cells such as perovskite cells, perovskite/Si tandem cells, perovskite/CIGS tandem cells, dye-sensitized cells, inorganic CZTSe cells, quantum dots cells, organic solar cells and other promising new PV technologies. Despite great advancements, these technologies are not yet advanced enough to be used in mass production. Research on these types of cells is extremely intensive in many laboratories, bringing new achievements in efficiency and stability. In particular, perovskite solar cells and tandem perovskite cells are interesting due to their high efficiencies and simple technological process. These cells, despite great progress, still struggle with the problem of long-term stability as well as the presence of toxic lead in high-efficiency perovskite cells. The aim this Special Issue is to present original results from theoretical and experimental research in the field of emerging PV technologies. Review papers are also welcome.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
