

Synthesis, Applications and Characterization of Advanced Precious Metal Materials

Guest Editor:

Dr. Shaohong Liu

Associate Professor, Key Laboratory for Anisotropy and Texture of Materials (Ministry of Education), Northeastern University, Shenyang, China

Deadline for manuscript submissions:

10 November 2024

Message from the Guest Editor

Precious metal materials are of significant value and show great performance in various fields, such as semiconductors, medicine, electronics, catalysts, etc. They have contributed to technological progress in these fields.

This Special Issue will offer a comprehensive overview of advanced precious metal materials. It will cover topics such as their production methods, recycling techniques, efficient utilization, sustainability issues, unique and fundamental characteristics, and role in the modern world. We invite works that focus on current trends in technology and assess their future prospects.

Readers who are interested in precious metal materials will benefit from this issue, which will provide them with information of importance and help them to advance the research and development of precious metal materials.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
