## Facile Synthesis and Applications of Doped Metal Oxide Nanomaterials

Guest Editors:

**Dr. S. Girish Kumar**

School of Engineering and Technology, CMR University, Bengaluru Main Campus, Bengaluru 562149, India

**Fayal Dsouza**

Assistant Professor, Department of Chemistry, School of Engineering and Technology, Bagaluru Campus, CMR University, Karnataka, India

Deadline for manuscript submissions:

**closed (20 November 2023)**

### Message from the Guest Editors

Dear Colleagues,

Metal oxides are explored as functional materials. In order to further improve the performance of metal oxide nanomaterials, doping/co-doping with impurities to alter the bulk structures of the host matrix has been a promising approach for many decades. In this context, this Special Issue is intended to be a collection of articles/reviews focusing on the facile synthesis and applications of doped metal oxides. The articles submitted must elegantly spotlight the facile preparation method, and the relevant material characterization related to the structural, morphological, and band gap response properties should be carefully dealt with to provide clear-cut insights into the doping effects. In particular, the co-doping process would be of more interest as it unfolds the doping mechanisms to a larger extent.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
