# **Physics, Electrical and Structural Properties of Dielectric Layers**

Guest Editor:

### Prof. Dr. Albena Paskaleva

Institute of Solid State Physics, Bulgarian Academy of Sciences, Tzarigradsko Chaussee 72, 1784 Sofia, Bulgaria

Deadline for manuscript submissions:

closed (10 April 2023)

# **Message from the Guest Editor**

Dielectric materials have a very wide application range in a different kind of sensors and detectors, data storage devices, electro-optic devices, transducers, energy harvesters, etc. In the studies of dielectric materials, of particular interest are issues such as the physics of charged dielectric materials, conduction mechanisms, dielectric polarization and dielectric relaxation mechanisms, space charge, nonlinear effects, and electric aging. Recent advances in deposition and processing of dielectric layers allow for superior control and tailoring of their properties to meet the requirements of a certain application. On the other hand, precise characterization techniques make possible the elucidation of the mechanisms that control these properties on a micro- and nanoscale in close relation to the technology of dielectric layer.

In this Special Issue, recent progress in dielectric layers, their technology, and advanced characterization are addressed. Emerging applications specific to dielectric material are also of particular interest.

It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and svstems. nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
