Message from the Guest Editors

This Special Issue of *Materials* concentrates on novel technologies, new findings and applications in the field of friction and wear in metallic materials and coatings. We are delighted to invite contributions to this Special Issue on “Advances in Friction and Wear Behaviors of Metallic Materials and Coatings”. Here, we will underline recent advances related to friction, wear, lubrication, coatings and film, and damage induced by interfaces. Research topics of interest may include, but are not limited to: tribology, friction, wear, coatings, film, lubrication, damage, surface engineering, wear mechanisms, test devices, and measurements of tribology.
