Message from the Guest Editors

This Special Issue aims to introduce new biobased hybrid or composite materials and their applications to improve biomaterial properties for tissue formation, tissue repair, cellular behaviors, and so on. As the guest editors of the Special Issue on these topics, which will be published in the Materials journal (Publisher, MDPI, St Alban-Anlage 66, Basel, Switzerland; IF 2019: 3.057), we would like to invite colleagues who have experience in the regenerative medicine field, especially who are experts in tissue engineering, to participate. We highly recommend submitting papers focused on the topics described by the keywords below, but submissions on related topics that are not mentioned will also be considered.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
