Deadline for manuscript  
submissions:

**closed (31 July 2021)**

### Message from the Guest Editor

Dear Colleagues,

The modification of nanocrystals by doping with particular ions is still a broadly studied area. This area is of particular interest because of the multiplicity of possible improvements to nanomaterials properties resulted in versatile applications. This Special Issue 'Ion-Doped Nanomaterials' encourages submissions that comprise important experimental information related to the following:

- Synthesis of new nanomaterials doped with ions, establishing parameters for the synthesis method, that can obtain high-quality nanocrystals with enhanced properties
- Detailed analysis and characterization of new properties or significant changes in the properties of nanomaterials doped by ions
- Characterization techniques
- New functions of the modified nanomaterials based on improved properties of nanocrystals doped with ions, including optical, magnetic and electronic devices and applications in biology, medicine, and energy

Dr. Agata Szczeszak

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
