## Additive Manufacturing towards the Design of 3D Advanced Scaffolds for Tissue Engineering (Second Volume)

Guest Editors:

### Prof. Dr. Roberto De Santis

Institute of Polymers, Composites and Biomaterials (IPCB), National Research Council of Italy, Mostra d'Oltremare Pad. 20, Viale J.F. Kennedy 54, 80125 Naples, Italy

### Prof. Dr. Antonio Gloria

Department of Industrial Engineering, Fraunhofer JL IDEAS-University of Naples Federico II, P.le Tecchio 80, 80125 Naples, Italy

Deadline for manuscript submissions:

**closed (10 March 2024)**

### Message from the Guest Editors

Dear Colleagues,

The design of 3D advanced scaffolds for tissue engineering is possible using innovative and creative engineering methods based on additive manufacturing (AM). This approach allows the generation of devices with complex architectural features and tailored functional properties, meeting design requirements and constraints. A variety of biocompatible materials can be processed through AM, such as degradable and non-degradable polymers, natural and synthetic materials, composites, metals and ceramics, etc.

The potential topics include, but are not limited to, the following:

- Design methods
- Conceptual design
- Creative design
- Design of experiments
- Design for additive manufacturing
- Topology optimization
- Generative design
- 3D/4D Printing
- Bioprinting
- Biomanufacturing and biofabrication
- Lattice structures
- Biomimetics and bioinspiration
- Computational design
- Artificial intelligence applications

# Special Issue

- Computer-aided engineering

# materials

- Reverse engineering
- Finite element analysis
- Modeling and simulation
- Cell–material interaction

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

### Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
