## Advanced Optical Methods for Materials Sciences

Guest Editors:

### Prof. Dr. Virgil-Florin Duma

1. 3OM Optomechatronics Group,  
Faculty of Engineering, Aurel  
Vlaicu University of Arad, 310130  
Arad, Romania

2. Doctoral School, Polytechnic  
University of Timisoara, 300006  
Timisoara, Romania

### Dr. Roger M. Groves

Faculty of Aerospace  
Engineering, Delft University of  
Technology, 2629 HS Delft, the  
Netherlands

Deadline for manuscript  
submissions:

**closed (20 October 2022)**

### Message from the Guest Editors

The aim of this Special Issue is to provide a forum for disseminating high-impact research about the development and use of both novel and established optical systems and their methods for materials studies. Such methods include, but are not limited to, those listed above, as well as their combination with other types of investigations, including mechanical testing, analytical approaches or simulations, and finite element analysis (FEA). All domains where advances in materials are of paramount importance are considered, from mechanical to electrical and electronic engineering, as well as to optics and photonics, with applications that range from industrial to biomedical.

All types of contributions, i.e., research papers, reviews and communications, are welcome.

While this forum is open to all researchers, it also provides a selection of papers prepared for the *1st International Conference 'Advances in 3OM: Opto-Mechatronics, Opto-Mechanics, and Optical Metrology'*, Dec. 13–16, 2021 (Timisoara, Romania), organized in celebration of 100 years of the Polytechnic University of Timisoara and of the International Day of Light (IDL).

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
