## Materials for Organic and Perovskite Solar Cells

Guest Editor:

### Dr. Paola Vivo

Hybrid Solar Cells, Faculty of  
Engineering and Natural  
Sciences, Tampere University, FI-  
33014 Tampere, Finland

Deadline for manuscript  
submissions:

**closed (31 August 2021)**

### Message from the Guest Editor

In recent years, extensive research efforts have been devoted to organic photovoltaics (OPVs) and perovskite solar cells (PSCs) emerging technologies. Both have the potential advantages of being low-cost, lightweight, bendable, and aesthetically attractive. While OPVs commercialization has already been recently launched, the younger yet more efficient PSCs technology still needs some critical concerns, namely the toxicity of lead (Pb) and the mediocre stability of PSCs, to be overcome before they can enter the market. Both still need further development from the materials perspective and device processing point of view to enhance their performance up to the theoretical limit, to boost their environmental stability, and to replace their toxic constituents with less harmful alternatives.

- Organic semiconductors
- Pb-based and Pb-free perovskites
- Charge selective contacts
- Electrodes and substrates
- Photovoltaic architectures
- Computational modeling and machine learning
- Advances in synthesis, thin-film deposition, and characterization
- Structure-property relationships
- Metal oxides
- Perovskite nanocrystals
- Electronic interactions at the photovoltaic interfaces

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
