Gdansk, Poland

Deadline for manuscript
submissions:

20 November 2024

Message from the Guest Editor

Dear Colleagues,

The global challenges of environmental pollution and energy scarcity have led to significant attention toward innovative solutions. This Special Issue aims to address these issues by focusing on the intersection of two critical fields: photocatalysis technology and green chemistry. Photocatalysis, with its ability to convert solar energy into valuable fuels and chemicals while mitigating organic pollutants, stands out as a promising approach to combat global energy shortages and environmental pollution. This call for papers is extended to researchers worldwide who are actively contributing to the field of photocatalysis, particularly those working on advanced photocatalytic materials.

Green chemistry, as an overarching philosophy, complements this initiative by emphasizing the design of chemical products and processes that prioritize sustainability. It not only prevents pollution at the molecular level but also spans across all facets of a chemical product's life cycle, from design to disposal. By applying innovative scientific solutions, green chemistry results in a source reduction, effectively preventing the generation of pollution.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
