Deadline for manuscript submissions: closed (30 June 2022)

Dear Colleagues,

During the last two decades, there have been splendid progresses in the research of CNTFs. Three representative techniques to spin CNTFs were developed in the early 21st century and have been improved competitively. In addition, various post-processing techniques have also been developed to further improve the properties of CNTFs. As a result, the state-of-the-art CNTFs possess mechanical properties comparable to that of commercial carbon fibers. The electrical conductivity and flexibility of CNTFs even outperform carbon fibers, making them versatile in various applications. Accordingly, using the excellent properties of CNTFs, various applications have been successfully demonstrated.

The special issue will comprehensively cover topics related CNTFs. The topics of interest include, but are not limited to:

- Spinning techniques of carbon nanotube fibers
- Post-processing of carbon nanotube fibers
- Properties of carbon nanotube fibers
- Characterization of carbon nanotube fibers
- Application of carbon nanotube fibers
- Synthesis of carbon nanotubes for fiber applications
- Other macroscopic assemblies of carbon nanotubes

### Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and svstems. advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
