Message from the Guest Editor

Dear Colleagues,

Two-dimensional (2D) magnetic materials have only emerged in recent years. This rapidly developing group of materials has attracted a high level of interest due to their novel 2D magnetic properties and possible applications as ultrathin magnetic materials in electronics and photonics.

This Special Issue will cover this fast-evolving field, with a focus on the synthesis, characterization, and application of 2D magnetic materials. Works from Physics, Chemistry, and Materials Science and Engineering are welcome, including interdisciplinary projects.
