### Message from the Guest Editor

Dear Colleagues,

I am delighted to announce a new Special Issue of *Materials*, titled "Manufacturing and Recycling of Natural Fiber-Reinforced Composites".

The aim of this Special Issue is to present the latest achievements related to the manufacturing processes, materials, mechanical characterization, recycling, and applications of natural fiber-reinforced composites. Research articles focusing on the following topics are welcome to be submitted to this Special Issue:

Identification of the optimal process parameters and verification of treatments aimed at improving the adhesion between fibers and matrices for the manufacture of natural composite structures;

Thermomechanical characterization of natural composites;

Description of industrial applications and markets regarding natural composites;

Investigation of the end-of-life of natural fiber-reinforced composites in the framework of the circular economy.

This Special Issue aims to reach widely across the research community to enhance the understanding of the present status and trends of natural fiber-reinforced composites.

Dr. Antonio Formisano Guest Editor

### Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and svstems. advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
