State-of-the-Art Nanomaterials in Energy and Environmental Applications

Guest Editors:

Dr. Govindasamy Palanisamy

School of Chemical Engineering, Yeungnam University, 280 Daehak-Ro, Gyeongsan 38541, Republic of Korea

Dr. Sivaprakash Paramasivam

Department of Mechanical Engineering, Keimyung University, Daegu 42601, Republic of Korea

Deadline for manuscript submissions: **20 November 2024**

Message from the Guest Editors

Dear Colleagues,

Advanced nanomaterials are transforming applications, enhancing material performance, and meeting the rising demands of supercapacitors and wastewater treatment. Nano-additives and nanostructured frameworks offer unique solutions Recent advancements in nanotechnology have opened new possibilities in energy storage and environmental preservation. Nanomaterials like nanofibers, nanoparticles, nanoplates, and nanorods are revolutionizing supercapacitors and wastewater treatment. Their uses range from boosting energy storage to efficient wastewater management. Research must focus on high-performance polymers and composites for supercapacitors and wastewater treatment. Our Special Issue highlights the latest breakthroughs in nanostructured materials, focusing on their use in these areas. Topics include tissue scaffolds, drug delivery, regenerative medicine. filtration, and environmental toxicology. Integrating nanostructures and innovative nanomaterials for energy and wastewater challenges is pivotal. We believe this Special Issue will offer innovative solutions to meet the growing demands in these crucial fields.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and svstems. advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
