Monitoring and Control in Additive Manufacturing Processes

Guest Editor:

Dr. Brian T. Gibson

Oak Ridge National Laboratory,
Knoxville, TN 37932, USA

Deadline for manuscript
submissions:

closed (10 December 2022)

Message from the Guest Editor

While significant progress has been made in terms of process development and control over the last decade, new generations of machines, larger build volumes, additional degrees-of-freedom, multiple points of deposition, new slicing techniques, novel sensors systems, and closed-loop control all present opportunities for additive manufacturing to reach new applications, achieve greater part quality, and accelerate adoption by industry.

It is my pleasure to invite authors to submit original research articles and review articles that will contribute to the broad area of monitoring and control in additive manufacturing processes, including metal-, polymer-, concrete-, and other material-based systems.

Special issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
