and Environmental Engineering,  
Politehnica University of  
Timisoara, 6 Vasile Parvan Bvd.,  
300223 Timisoara, Romania

### Dr. Narcis Duteanu

Faculty of Industrial Chemistry  
and Environmental Engineering,  
Politehnica University of  
Timisoara, 2 Piata Victoriei, RO  
300006 Timisoara, Romania

Deadline for manuscript  
submissions:

**closed (20 June 2022)**

### Message from the Guest Editors

Rapid development of human society over the last hundred years has resulted in a sharp increase in the number and amount of pollutants emitted into the environment, leading to severe imbalances. Simultaneously, there was observed a huge increase in the use of rare earth elements. Broad diversification of industrial products used for improvement of our living conditions is responsible for most pollutant emissions. In this context, it is important to produce suitable materials (adsorbents, catalysts, and so on) to reduce the pollutant amount discharged into the environment. Most suitable technology used for rare earth metal recovery is represented by adsorption. In this context, it is important to better understand rare earth metallic ions adsorption – desorption processes.

The topics of interest include, but are not limited to: adsorption, desorption, characterisation techniques, scanning electron microscopy, scanning probe, optical microscopy, X-Ray diffraction, FT-IR.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
