## Advanced Materials for Transport Applications 2020

Guest Editors:

**Dr. Dirk Lehmus**

**Dr. Axel von Hehl**

**Dr.-Ing. habil. Jörg Hohe**

**Dr. René Alderliesten**

**Dr.-Ing. Kambiz Kayvantash**

**Prof. Dr. Leif Asp**

**Prof. Dr. Joachim Hausmann**

Deadline for manuscript  
submissions:

**closed (30 September 2020)**

### Message from the Guest Editors

The present Special Issue is linked to the symposium E1, also entitled “Advanced Materials for Transport Applications”, which will take place within the framework of the Euromat 2019 conference held in Stockholm, Sweden, from September 1st to 5th, 2019 and covers the whole field of materials science and technology. Within this framework, our own symposium addresses questions related to the use of advanced materials in the transport industry, which includes the aerospace, automotive, railway and maritime sector. The symposium is the 6th of its kind at Euromat and thus continues a series which originated at Euromat 2009.

Though linked to the Euromat 2019 symposium, the Special Issue is open for external contributions addressing aspects of advanced materials for transport applications.

Highlighted topics include:

- Hybrid Engineering Materials, Structures & Processes and Multi-Material Design
- Additive Manufacturing for Transport Applications
- Metal Casting Technology
- Materials for E-Mobility
- Intelligent Materials, Structures and Systems
- Simulation, Modeling, Optimization and Big Data Applications

Not covered is civil engineering for transport infrastructure.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
