### Message from the Guest Editors

Dear Colleagues,

This Special Issue will be devoted to new developments and fundamental advances on carbon materials with tuned textural and surface chemical properties, including graphene, carbon nanotubes, aerogels, xerogels, and carbon nanospheres, among others. Carbon-based doped materials and carbon-metal or metal oxide are also among the topics of interest. The main targeted applications are in photocatalysis, electrocatalysis, energy production, and storage and so on.

It is our pleasure to invite you to submit a manuscript for this Special Issue. Full papers, short communications, and reviews are welcome.
