submissions:

closed (31 January 2020)

Message from the Guest Editor

This Special Issue is intended to cover the latest advances and developments in the synthesis, characterization, structure-properties relationship and applications of electrically conducting polymers, with particular attention to the role of nanosized shape and the properties of novel CP-inorganic hybrid composite nanostructures. Topics including, but not limiting to, synthesis, characterization and properties study of new conducting polymers from novel functionalized monomer derivatives, development of methods for controlled growth of nanostructures (interfacial, micellar, templated, molecularly imprinted or other structure-directing polymerization), novel hybrid CP composite nanoarchitectures with metal oxide nanoparticles, carbon materials or clays and applications of the above materials in the fields of optoelectronics, energy production and storage, environment, sensing, and so on, are all welcome.

It is my pleasure to invite you to contribute to this Special Issue. Original, high-quality research articles and reviews are encouraged for submission.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
