Deadline for manuscript submissions:

closed (31 December 2021)

## Message from the Guest Editor

This Special Issue on "Feature Papers in Electronic Materials Section" aims at collecting the most recent advances on electronic materials and devices in different fields of interest (e.g., nanotechnology, power- and highfrequency electronics, optoelectronic devices, sensors). For that reason, this Specail Issue will include a large variety of materials and related device technologies, such as nanostructures, binary and complex oxides, insulators, metallizations (Schottky, Ohmic), conventional semiconductors (Si, Ge, SiGe, GaAs, etc.), wide band gap semiconductors (SiC, GaN, Ga2O3, ZnO, AlN, diamond, etc.), heterostructures, nanowires, 2D materials and compounds (graphene, hexagonal boron nitride, transition metal dichalcogenides, etc.), optical and energy harvesting materials, etc. In addition, the development and application of advanced characterization techniques to electronic materials and devices are also in line with the scope of the SI.

The submission of regular articles and review papers on the above electronic materials and related devices is welcome.

### **Editor-in-Chief**

#### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, OC H3A 0C7, Canada

## **Message from the Editor-in-Chief**

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and systems. nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
