Deadline for manuscript  
submissions:

**closed (30 April 2020)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue is dedicated to gold nanoparticles (Au NPs); advanced materials that represent a wealth of applications in (electro)catalysis, electronics, sensing, nanobiotechnology, diagnostics and therapeutics, among others. Au NPs can be easily synthesized with various sizes, shapes and surface functionalities in order to meet the requirements of specific applications. Owing to surface plasmon resonance (SPR) effects in the visible range, they possess unique size- and shape-dependent optical properties, e.g., light absorption in the near infrared (IR) spectrum of electromagnetic waves. These properties make them suitable for SPR-based biosensor devices, surface enhanced Raman scattering studies (SERS) and biomedical applications, such as photodynamic therapy, where light absorption results in local heat dissipation that can be applied to kill cancer cells, as an example.

Full papers, communications, and reviews are all welcome.

Prof. Marga Cornelia Lensen

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
