Message from the Guest Editors

Dear Colleagues,

New generations of hybrid nanomaterials and nanocomposites with enhanced performance and tailorable properties are finding increasing application in many areas, including environmental protection, biomedicine, sensing, catalysis, or multifunctional protective coatings.

It is our pleasure to invite you to publish your work in this Special Issue of *Materials* entitled “**Synthesis and Characterization of Hybrid Nanomaterials and Nanocomposites**” in the form of full articles, communications, or reviews. The aim of this Special Issue is to gather articles describing new concepts related to the synthesis, functionalization, characterization, and application of different classes of hybrid nanomaterials.
