### Message from the Guest Editors

Dear Colleagues,

This Special Issue welcomes contributions devoted to the synthesis, applications and properties of novel low dimensional functionalized nanofibers produced by electrospinning. In these electrospun nanofibers, a wide variety of functional inclusions can be incorporated. These composite nanofibers can be rendered active or responsive to a variety of magnetic, electric, optical, thermal, mechanical and environmental stimuli, considerably widening their applicability.

This Special Issue will aim to address and report novel low dimensional nanocomposite fiber materials and their synthesis methods, new functional and multifunctional nanofiber properties, as well as innovative applications that have been proposed or implemented from them in recent years.

Prof. Dr. Bernardo Gonçalves Almeida

Prof. Dr. Etelvina de Matos Gomes

Dr. Rosa Maria Ferreira Baptista

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
