New Materials and Techniques for Orthodontics

Guest Editors:

Dr. Maria Francesca Sfondrini
Unit of Orthodontics and Paediatric Dentistry, Section of Dentistry, Department of Clinical, Surgical, Diagnostic and Paediatric Sciences, University of Pavia, 27100 Pavia, Italy

Dr. Andrea Scribante
Unit of Orthodontics and Paediatric Dentistry, Section of Dentistry, Department of Clinical, Surgical, Diagnostic and Paediatric Sciences, University of Pavia, 27100 Pavia, Italy

Deadline for manuscript submissions:
closed (10 October 2022)

Message from the Guest Editors

New materials and techniques that are frequently introduced in daily clinical practice need continuous study and research. Accordingly, the purpose of the present Special Issue is to collect current research about the materials used in clinical orthodontics. Possible research topics include but are not limited to: adhesives, aligners, archwires, bond strength bonding interfaces, brackets, CAD/CAM, caries prevention, composites, digital impressions, digital workflow, elastodontics, fiber-reinforced composites, fixed appliances, lingual appliances, miniscrews, multi-disciplinary treatment, oral microbiology, retention, and skeletal anchorage. Additionally, materials that could influence behavioral science or patients' compliance and radiography techniques may also be taken into consideration.

Analyses of the chemical, physical and mechanical characteristics of orthodontic materials, along with basic and translational research studies, mechanical analyses, clinical trials and reviews will be considered for publication.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
