## Mechanical Alloying and Heat Treatment

Guest Editor:

**Prof. Dr. Malgorzata Karolus**

Institute of Materials Engineering,  
Faculty of Science and  
Technology, University of Silesia  
in Katowice, Katowice, Poland

Deadline for manuscript  
submissions:

**closed (20 October 2022)**

### Message from the Guest Editor

Dear Colleagues,

You are cordially invited to publish original scientific articles describing the results of research works or review articles in a Special Issue entitled “Mechanical Alloying and Heat Treatment”. Mechanical alloying is a promising method for the synthesis and production of a wide variety of materials with homogeneous structures and desired properties. MA enables the formation of solid solutions, intermetallic phases, or nanocrystalline or amorphous materials with unique physical, chemical, and mechanical properties.

The submitted works may therefore concern both innovative engineering materials with modification of their structure and physico-chemical properties, as well as original technological modifications used in the methodology of mechanical alloying, with particular emphasis on heat treatment. You can also focus on the development of new technological solutions and mathematical models which will be helpful in formulating new conclusions.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
