## Micro/Nanomechanics: From Theory to Application

Guest Editors:

### Prof. Dr. Takahiro Namazu

Faculty of Engineering, Kyoto  
University of Advanced Science  
(KUAS), Kyoto 615-8577, Japan

### Prof. Dr. Shugo Miyake

Kobe City College of Technology,  
Kobe, Japan

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

The Special Issue focuses on the newest technologies in micro-/nano-mechanics for the experimental measurement and theoretical calculation of, not only mechanical properties, but also electrical and thermal properties. In addition, applications focused on the following topics will be considered for inclusion: micro-electromechanical systems (MEMS), nano-electromechanical systems (NEMS), microsensors, smart devices, and electronic devices. The continued growth and challenge of science technologies in all industrial fields fundamentally support life through energy saving, the improvement of global environments, and securing safety. Particularly, the dominating general properties of any devices and materials, micro-/nano-mechanics, and material characteristics fascinate us. Original papers are solicited in order to aid and promote our understanding of these subjects. We are especially interested in, but are not limited to, the following topics: mechanical properties, thermal properties, electric properties, experimental method, testing, MEMS/NEMS devices, and related functional materials. Articles and reviews dealing with the above keywords are very welcome.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
