## Advanced Low Dimensional Nanocarbon Based Silica Composites

Guest Editor:

**Dr. Gabriela Mera**

Materials and Earth Science  
Department, TU Darmstadt, D-  
64287 Darmstadt, Germany

Deadline for manuscript  
submissions:  
**closed (15 July 2021)**

### Message from the Guest Editor

The scope of this Special Issue includes, without being limited to, the following topics:

- *Synthesis Methods*: gas-phase techniques (e.g., CVD, ALD); liquid-phase methods (sol-gel, solvothermal, etc.); and solid-state procedures (different sintering techniques, polymer-derived ceramics; mechanical alloying, etc.);

- *Properties*: electronic; optical; magnetic; catalytic, high temperature resistance to crystallization and decomposition; mechanical; charge carriers transport; thermal transport; etc.;

- *Micro-/nanosstructure*;

- *Applications*: electronic applications; high-temperature structural applications; catalysis; energy conversion and storage, lightning, coatings, etc.

It is our pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews that cover all aspects (i.e., synthesis–structure–property relationships, applications and future directions) of nanocarbon–silica composites are all welcome.

Thank you very much for your consideration. We will be happy to receive a contribution from you, and we look forward to hearing from you soon.

Dr. Gabriela Mera

# Special Issue

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

### Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

## Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
