### Message from the Guest Editor

It is my pleasure to invite you to submit a manuscript for this Special Issue focused on novel NDT approaches, development of single and integrated measurement techniques, and advanced signal processing and modeling. The aim of this Special Issue is to gather the experience of civil, mechanical, and aerospace research communities in the latest advances and trends in the field of non-destructive diagnostics of structures and their components.

The topics of interest include but are not limited to:

- Condition assessment of civil, mechanical, aerospace, and offshore structures, as well as connections of structural elements;
- Diagnostics of cultural heritage monuments;
- Testing of structures made of novel materials;
- Structural health monitoring systems;
- Integration of non-destructive testing methods (e.g., guided waves, ground penetrating radar, acoustic emission, thermography);
- Advanced signal processing for NDT;
- Damage detection and damage imaging;
- Modeling and numerical analyses for supporting SHM systems.
