Feature Papers in Thin Films and Interfaces

Guest Editors:

Prof. Dr. Nikolas J. Podraza
Department of Physics and Astronomy & Wright Center for Photovoltaics Innovation and Commercialization, University of Toledo, Toledo, OH, USA

Prof. Dr. Jordi Faraudo
Materials Simulation and Theory Department Institut de Ciència de Materials de Barcelona (ICMAB-CSIC) Campus de la UAB, E-08193 Bellaterra, Spain

Prof. Dr. Dameng Liu
State Key Laboratory of Tribology, Tsinghua University, Beijing 100084, China

Message from the Guest Editors

The unique structural, chemical, electrical, optical, magnetic, and mechanical properties of thin films compared to their bulk counterparts arise from the compositional and structural design, interactions with other materials or ambient, defects, and other characteristics. Similarly, the nature of thin films often involves complicated interactions between materials at interfaces utilized to manipulate chemical reactions, diffusion, self-assembly, and other physical processes, their fundamental understanding, characterization, and application continuously advancing. It is my pleasure to invite you to submit a manuscript for our Special Issue "Feature Papers in Thin Films and Interfaces", with topics including, but not limited to, thin film deposition and processing, advanced characterization techniques, fundamental properties of materials and systems, computational studies, and emerging applications, full papers, communications, and reviews being welcome.

Deadline for manuscript submissions:
closed (20 August 2023)

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
