Advances in Metal Coatings for Wear and Corrosion Applications

Message from the Guest Editors

Wear- and corrosion-resistant coatings are among the most effective technological means for increasing the durability of equipment and machines and reducing labour, energy, and material costs; they are being increasingly used in all technical fields. In many cases, using coatings is the only possible or most economical decision to solve several technical problems. However, for the various products' numerous and different operating conditions, it is necessary to create coatings that differ in composition, structure, and morphology. This Special Issue, titled "Advances in Metal Coatings for Wear and Corrosion Applications", aims to collate the latest advances in the field of wear- and corrosion-resistant coatings and provide a platform for their dissemination among scientists, researchers, and industrial experts. We cordially invite you to contribute a research or review article to this Special Issue and make your scientific work more discoverable and popular.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
