

Special Issue

Formation, Microstructure and Behavior of Metastable Austenite in Advanced High-Strength Steels

Message from the Guest Editor

This Special Issue, "Formation and Behavior of Metastable Austenite in Advanced High-Strength Steels", will include research papers and reviews on all aspects of metastable austenite in steels including, but not limited to, advanced processing of austenite-containing steels, austenite formation during heat treatment, microstructure development, solute partitioning and stabilization, effects of chemical composition, size, shape and triaxiality on austenite stability, stacking fault energy (SFE) effects, deformation-induced transformation under monotonic uniaxial or multiaxial loading, as well as cyclic loading, advanced experimental techniques to monitor the deformation-induced austenite transformation, modeling and simulation and finally alloy and process design for enhanced TRIP effects.

Guest Editor

Prof. Dr. Gregory N. Haidemenopoulos

Department of Mechanical Engineering, University of Thessaly, Athens Avenue, Pedion Areos, 38334 Volos, Greece

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
