

Special Issue

Design, Application and Performance Improvement of Pavement Materials

Message from the Guest Editors

This Special Issue of *Materials* (MDPI) on the design, application and performance improvement of pavement materials aims at providing researchers and scientists with a unique and rewarding opportunity to introduce new and emerging ideas associated with this topic. With the fast-paced evolution of technologies and in the context of ever-growing complexity of technical challenges in pavement engineering, it is crucial to gather state-of-the-art knowledge. Researchers and scientists of the pavement engineering and materials fields are therefore invited to submit original contributions related, but not limited, to areas such as sustainability, recycling, emerging or smart materials, mix design and durability, and methods for design and construction

Guest Editors

Dr. Jean Pascal Bilodeau

Dr. Junyan Yi

Prof. Dr. Alan Carter

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
