Advances in Phosphate Materials: Structural, Technological and Biomedical Applications

Message from the Guest Editors

Phosphates are a large group of materials that are present in nature as minerals and can also be synthesized. The impact of inorganic phosphorus in the form of phosphate PO_4^{3-} is undeniable in our lives, since it is a basic constituent in the most vital biological macromolecules in living organisms, such as RNA, DNA, ADP, ATP, proteins, and lipids. The biological apatite that forms hard bones and teeth is carbonated hydroxyapatite, which is a phase of calcium phosphates.

Guest Editors

Prof. Dr. José R. García

Department of Organic and Inorganic Chemistry, University of Oviedo–CINN (CSIC), Oviedo, Spain

Dr. Alaa Adawy

Institute for Scientific and Technological Resources, University of Oviedo, Oviedo, Spain

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
