### Message from the Guest Editor

You are cordially invited to submit contributions to this Special Issue, which aims to publish highly rated manuscripts presenting recent developments and applications of a broad range of magnetostrictive materials including material development, design and fabrication of sensor systems, theoretical considerations, numerical simulations and experimental results. Papers exploring the research frontiers of magnetostrictive materials and their applications are explicitly welcome.

Topics include but are not limited to the keywords listed as follows:

- Giant magnetostriction
- Magnetomechanical effects
- Magnetostrictive materials in sensor technology
- Magnetostrictive materials in actuator technologies
- Magnetostrictive materials in energy harvesting
- Magnetostrictive polymer composites
- Magnetostrictive materials in magnetoelectricity
- Non-Joulian magnetostriction
- Self-sensing with magnetostrictive materials
- Straintronics
- Technology of magnetostrictive materials
