Special Issue

Advanced Metal Forming Processes

Message from the Guest Editors

The plastic deformation of metals and alloys is very important in metal forming processes. Metal forming processes are characterized in that the metal being processed is plastically deformed in order to shape it into a desired geometry. Along with the change in size and shape of a plastically deformed product, the structure and properties vary. This makes it possible to use a plastic deformation process step, modifying the structure and properties of the metals and alloys in the desired direction. Many procedures and methods exist, such as traditional (forging, extrusion, pressing, and rolling) and advanced metal forming processes, for example, severe plastic deformation processed (equal channel angular pressing (ECAP), equal channel angular rolling (ECAR), and high-pressure torsion (HPT)); and additive manufacturing processes (powder bed fusion). This Special Issue aims to present the latest works in the research and development of advanced metal forming processes. It is our pleasure to invite you to submit a manuscript to this Special Issue. Full papers, communications, and reviews are welcome for submission.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)
