

Advances in Mathematical Modelling and Statistical Methods for Risk Management

Guest Editors:

Prof. Dr. Gaofeng Da

College of Economics and Management, Nanjing University of Aeronautics and Astronautics, Nanjing 210016, China

Dr. Tiantian Mao

Department of Statistics and Finance, School of Management, University of Science and Technology of China, Hefei 230026, China

Dr. Fan Yang

Department of Statistics and Actuarial Science, University of Waterloo, Waterloo, ON N2L 3G1, Canada

Deadline for manuscript submissions:

closed (30 April 2024)

Message from the Guest Editors

Dear Colleagues,

We would like to invite you to submit your recent research to the Special Issue titled “Advances in Mathematical Modelling and Statistical Methods for Risk Management”, appearing in the journal *Mathematics*. This issue will provide an opportunity for researchers to present up-to-date mathematical and statistical methods for modeling risks, such as market, credit, operational risks, in the field of risk management. The broad applications can be found in, but are not restricted to, finance, economics, actuarial science, and reliability. We welcome high-quality research papers that address areas including, but not limited to, risk measures, extreme value theory, reliability, actuarial science, and mathematical finance in general.

Prof. Dr. Gaofeng Da

Dr. Tiantian Mao

Dr. Fan Yang

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
