

Mathematical Methods and Operations Research in Planning, Scheduling and Supply Chain

Guest Editors:

Dr. Christophe Sauvey

Computer Engineering,
Production and Maintenance
Laboratory, Université de
Lorraine, Metz, France

Dr. Wajdi Trabelsi

ICN Business School, LGIPM, F-
57000 Metz, France

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Mathematical methods and operation research tools have been useful over recent decades to solve many industrial problems, such as supply chain design, planning or scheduling issues. Through the development of new technologies, the industries of today are experiencing the fourth revolution, referred to as Industry 4.0, and are anticipating the fifth revolution, which will allow us to merge the power of smart, precise and accurate machinery with human creativity and ingenuity.

This Special Issue aims to present recent advances in the following topics:

- Scheduling optimization under multiple industrial constraints;
- Supply chain operations management;
- Production planning in a sustainable supply chain;
- Planning optimization under uncertainties and human aims considerations;
- Emergency/e-commerce/reverse/green/metropolitan/5.0 logistics;
- Scheduling in sustainable manufacturing;
- Optimal decisions, hybrid optimization and multi-objective optimization;
- Sustainable logistics systems design;
- Modelling and optimization of complex industrial processes;
- Digital technologies support for logistics and supply chain management.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
