Message from the Guest Editor

Dear Colleagues,

As the human population grows, the problem of efficient natural resource management is turning into an urgent issue. This Special Issue is devoted to further understanding the mechanisms behind optimal resource management, from both an optimal control and game-theoretic perspective. However, this Special Issue is not restricted to studying only natural resources, both renewable and non-renewable, and will consider potential applications such as human resources, future materials, and non-material assets.

The purpose of this Special Issue is to establish a collection of papers that provide novel insights on mathematical theories of resource management. We welcome both theoretical papers and case studies.

Prof. Dr. Ekaterina Gromova

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
