

Applied Medical Statistics: Theory, Computation, Applicability, 2nd Edition

Guest Editor:

Prof. Dr. Sorana D. Bolboacă

Department of Medical Informatics and Biostatistics, “Iuliu Hațieganu” University of Medicine and Pharmacy, Louis Pasteur Str., No. 6, 400349 Cluj-Napoca, Romania

Deadline for manuscript submissions:

closed (31 July 2023)

Message from the Guest Editor

Scientific knowledge in medicine must be reproducible, with accurate and reliable statistical analysis. Both components are a ‘must’ since scientific research in medicine aims to improve medical outcomes. Statistical methods need proper understanding by researchers and readers to produce the expected outcomes, namely successful medical diagnosis and treatment. Considerable progress in medical statistics has been achieved during the last decade, and many methods exist, but sometimes they are too complex to be easily understood by physicians.

This Special Issue on “Applied Medical Statistics: Theory, Computation, Applicability II” aims to gather under the same umbrella statistical guidelines as structured and straightforward tools to be easily understood by physicians and replicated by researchers. The manuscripts must clearly and easily explain information about the methods, how they work, and their clinical applicability, as instruments for critical appraisal of the medical scientific literature. Statistical methods and applications in medicine, dental medicine, pharmacy, and veterinary medicine are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
