

Operations Research and Optimization: Mathematical Methods and Applications

Guest Editors:

Prof. Dr. David Canca

Department of Industrial Engineering and Management Science, Universidad de Sevilla, 41092 Seville, Spain

Prof. Dr. Gabriel Villa

Department of Industrial Engineering and Management Science, University of Seville, 41092 Seville, Spain

Deadline for manuscript submissions:

31 March 2025

Message from the Guest Editors

Dear Colleagues,

Operations research is an applied science focused on formulating and solving quantitative decision problems in a wide variety of areas. This Special Issue aims to serve as a platform to disseminate recent research in this field, both theoretical and applied, in the most distinct operations research application areas. Submissions including new theoretical results, models and algorithms, and new applications are welcome. Potential topics include but are not limited to:

- Integer linear programming and combinatorial optimization problems;
- Exact integer and combinatorial solving methods and techniques: branch-and-bound, branch-and-cut, decomposition-based methods, reformulations, linearizations;
- Approximated solving methods: heuristics, metaheuristics, metaheuristics, and model-based metaheuristics for integer and combinatorial optimization problems; hybridized approaches;
- Real-world OR applications in industry and services: operations management, supply chain management, logistics and transportation, production planning, scheduling, energy, telecommunications, location, and healthcare.

an Open Access Journal by MDPI

Editor-in-Chief

Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
