Mathematical Modeling, Algorithms, and Inverse Problems in Imaging Sciences

Guest Editor:

Dr. Wei Wang
School of Mathematical Sciences, Tongji University, Shanghai 200092, China

Deadline for manuscript submissions:
30 September 2025

Message from the Guest Editor

Dear Colleagues,

The new Special Issue aims to present new trends in mathematical modeling, algorithms, and related inverse problems in imaging sciences. The restoration, enhancement, segmentation, decomposition, analysis, registration, compression, and representation of two- or three-dimensional images are important to many areas of science. As a result, mathematical, statistical, and computational methods and algorithms are increasingly being employed in these research areas. Any aspects related to the above-mentioned research are welcome and valuable to this Special Issue.

Dr. Wei Wang
Guest Editor

Special Issue

Editor-in-Chief

Prof. Dr. Francisco Chiclana

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
