This Special Issue on "Research and Advances in Network Security" aims to showcase cutting-edge research that addresses the multifaceted challenges in this field. The contributions will encompass a broad spectrum of topics, ranging from innovative security protocols to advances in cryptographic techniques, and from intrusion detection systems to the application of artificial intelligence in cybersecurity.

We invite researchers and practitioners from around the world to contribute their work to this Special Issue. By sharing your research, you are contributing to a vital dialogue on network security that promises to influence best practices and policymaking, shaping a safer digital world for tomorrow.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
