

## Recent Advances in Mathematical Models and Algorithms for Big Data Analytics

Guest Editors:

**Prof. Dr. Hai-Lin Liu**

School of Mathematics and Statistics, Guangdong University of Technology, Guangzhou 510520, China

**Prof. Dr. Yuping Wang**

School of Computer Science and Technology, Xidian University, Xi'an 710071, China

**Prof. Dr. Ping Guo**

International Academic Center of Complex Systems, Beijing Normal University, Beijing, China

Deadline for manuscript submissions:

**closed (31 August 2025)**

### Message from the Guest Editors

Nowadays, mathematical models and information technology in a big data context have become a popular new research topic among academics and the industry. Big data refers to a collection of data sets that are too large or too complex for efficient processing and analysis using traditional database management tools. The development of mathematics models and information technology in a big data context will enhance decision making, insight discovery, and process optimization. However, there are still numerous technical challenges and issues that need to be improved and broadly explored. This Special Issue aims to provide readers with the latest and most innovative research on all theoretical and practical aspects of information technology and mathematical models for big data analytics.

The aim of this Special Issue is to present a collection of high-quality research articles on state-of-the-art mathematical models, information technology, and big data analytics.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
