

Mathematical Modeling and Optimization of Energy Systems

Guest Editor:

Dr. Kotb Basem Tawfiq

Department of
Electromechanical, Systems, and
Metal Engineering, Ghent
University, 9000 Ghent, Belgium

Deadline for manuscript
submissions:

closed (15 September 2024)

Message from the Guest Editor

Rapid global economic growth has resulted in continually rising energy consumption. Since the industrial revolution, conventional petroleum derivatives, such as coal, oil, and flammable gas, have been the primary energy sources. As a result, significant efforts are being made to generate energy from renewable sources, such as wind, solar, and so on. The recent focus of research has also been targeted toward the reliable and improved performance of renewable energy systems, with a focus on all components of the systems, including the power converter and its controlling techniques.

We invite the submission of original research or review papers to this Special Issue of *Mathematics*, entitled “Mathematical Modeling and Optimization of Energy Systems”. The main objective of this Special Issue is to promote new advancements, developments, and applications of control, modeling and optimization in the field of energy systems. Additionally, we aim to highlight the possibilities of the careful integration of the energy system within the electric grid. Moreover, it is important to consider this impact, especially under fault conditions.

an Open Access Journal by MDPI

Editor-in-Chief

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
